COMPANY

Company

F-TECH means: consulting, planning, construction and innovation of snowparks. We offer ground breaking Snowboard Boxes and Rails, perfect shaped structures with razor-sharp edges and a lot of fantasy and passion for details upon the realization of our projects.

We also organize and promote events and offer web and print marketing solutions for snowparks and ski-resorts. To guarantee first class videos and photos, we provide Photographers, Filmers and Teamriders.

SERVICE

CONSULTING AND 3D PLANNING

360° project management and sustainable assistance. Area survey, consulting meetings about park size, location and eventual earthwork operations. Measurement and 3D project design. Precise calculations regarding the amount of snow needed, bodywork, maintenance and machine expenditure all shown to you in a complete cost-plan.

SERVICE

SNOWPARK CONSTRUCTION AND SHAPING

We care about our clients. That's why we give you the complete package: from supervising the groundworks to the consulting of artificial snow production until the last shovel move. We will show your workers how to use the snow groomers in the snowpark at its best. And if you need, these works can even be done by us.

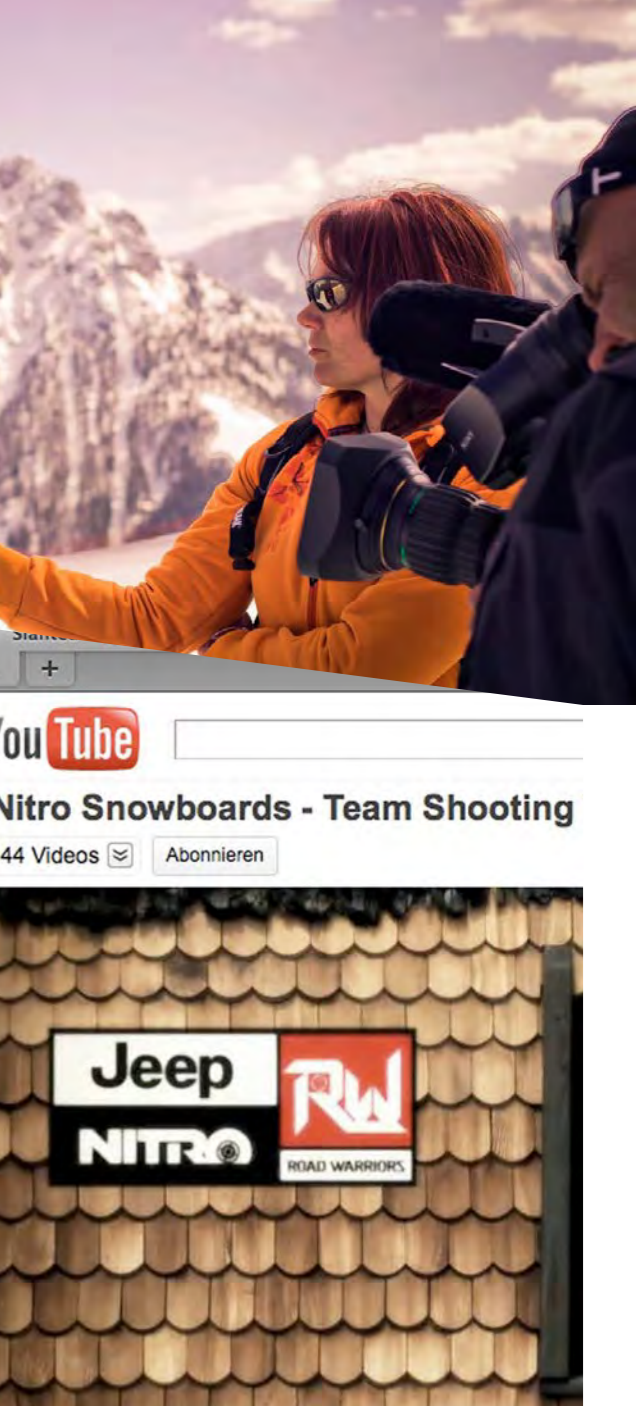

SERVICE

COMMUNICATION AND MARKETING

To guarantee the success of your snowpark it is extremely important to use all kinds of media. We have a wide range of agreements with the leading media sector all over Europe. We also do print and non print advertising for your snowpark or skiresort and have know-how in customer focused promotion. Furthermore we do video and photo productions and work on the main social networks. If you desire we can provide marketing consulting services to increase your business.

PHOTO AND VIDEO PRODUCTIONS

We organize shootings and events of every kind and produce podcasts, event and promotional park clips. We also collaborate with Europe-wide known photographers, film crews and brands.

PRODUCT

BOX

Perfect slide attributes, an innovative lightweight design and a variety of combination possibilities, make F-TECH boxes different. Our boxes and rails are marked with the intentional colors used to indicate the difficulty of the slopes (Blue – Easy, Red – Medium, Black – Pro)

RAIL

For our rails we use the same color system. Through the modular configuration of our rail elements we can build rails in every shape. You have also the choice between pipe and plate rails.

KIDS

To give kids and ski schools a good way to get into the freestyle sport we build small and easy obstacles for kids, which we developed in close collaboration with ski schools. Those smaller and light obstacles can easily be carried to other positions and are marked by their green color.

PRODUCT

JIB

No matter which material you desire (wood, metal, or synthetic material) we build all kind of different jib obstacles for snowparks or for special shootings.

WALL

Walls are a basic obstacle in every snowpark. We build them, but if you want also in more creative shapes and with special features.

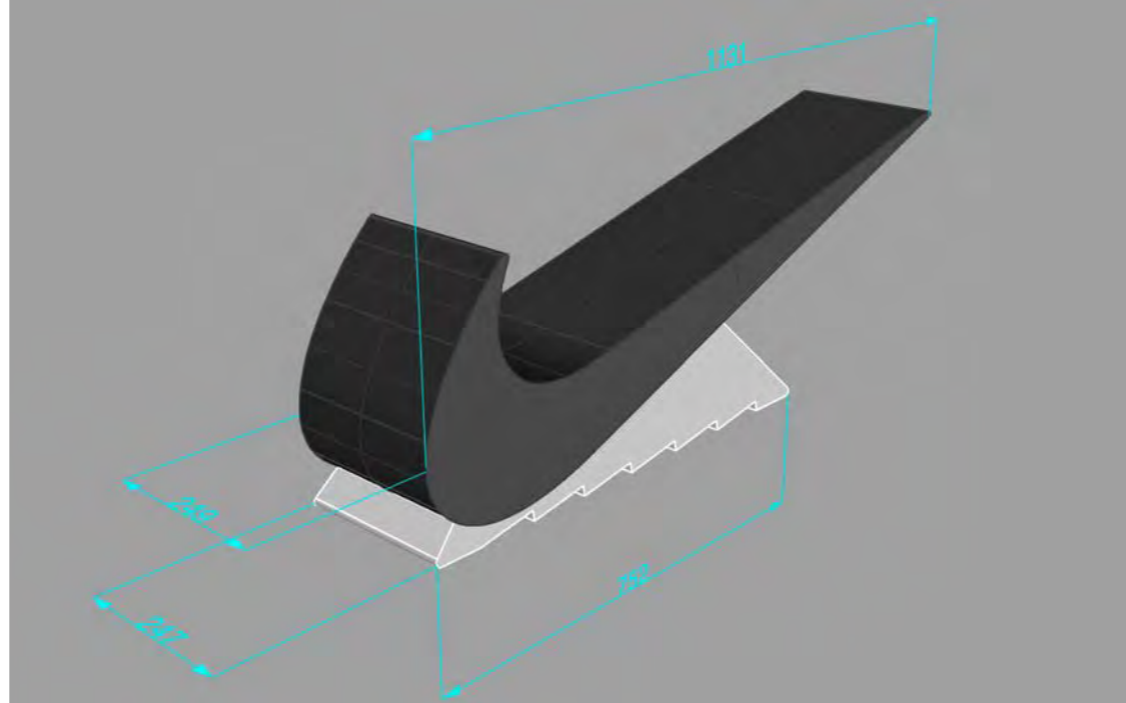

TUBE

We offer tubes in different sizes and shapes. Certainly in all colors and in whatever style you want them.

PRODUCT SPECIAL

We produce 3D logos individually for your brand visibility in our snowparks or for special photo and videoshootings.

- 105 Freestyle Series by Burn Energy Drink, Italy

F-TECH CRFW

SINCE 2001

From the first day on, we had a lot of great projects and good times. In this book we want to share all the memories which remained beside the magazine articles, movies and reports. Although F-TECH's main business is snowpark construction we are very flexible and do all kind of other work in this sector. Supporting the freestyle movement was always our main goal... and you can be assured that we will go on and set new standards.

F-TECH FAMILY

THANK YOU ALL

Did you ever asked yourself what the 'F' in F-TECH stands for? A good guess would be: family. All the shapers, supporters and Friends, your passion for the sport makes all this possible. At this point we want to say thank you! Also thanks to all those who aren't on the photos.

F-TECH TEAM

TEAM SNOWBOARD

TEAM SKI

Having our own team makes us proud. But of course that's not the only reason we have a Ski and Snowboard team. A lot of our team riders work as shapers, help us to test new obstacles, and bring in their know how and experience.

SNOWPARKS

WALSENALES

VAL SENALES

GENTLEMENRIDERS NITRO PARK VAL SENALES

Although Senales has been welcoming the snowboard scene since the very beginning (for about 20 years now), the rebirth itself came 2006 with the F-TECH Crew taking care of the park. By building one of the best parks it got famous for snowboarding all over Italy and Europe since you're able to ride there in summer as well.

Val Senales is a glacier and that's why the park is open from mid October to the end of May. In the summer you can shred the park from mid June to the end of July at the Val Senales Summer Camp.

KRONPLATZ

KRONPLATZ

SNOWPARK KRONPLATZ

Four different lines on 58.300 square metres. What else do we have to say? The park starts on a height of 2.230 metres and processes right under the lift which makes it perfect for shootings. In the valley, just 10 minutes from the city of Bruneck, you can find a smaller but super fun jib park with 7 tables which is well lit two nights a week. Two shapers, two snow groomers always at your disposal and the most motivated crew – this is what keeps this park F-TECH-like aka perfect.

SEISER ALM

SEISER ALM

KING LAURIN SNOWPARK

This snowpark offers something for everyone. Long lines with heaps of structures for pros and beginners. Since 2001 we take care of this awesome park and we organize high level contests like SUBJECT SCHLERN and GARDEN OF ROSES. Always accompanied by the legendary barbecues of the local snowboard crew: THE PANETTONE BROS. You can find this wonderland on the „LAURIN“ slope. The park consists of two parts, an upper and a lower one. Every part is divided in 2 – 3 different lines.

At the Seiser Alm nature is still respected and beloved. That's why we created a WOOD LINE right near the forest with a great view to the Dolomites... sunset included!

OBERREGGEN

OBEREGGEN

OBEREGGEN SNOWPARK

Since 2007 this snowpark has been realized by the Obereggen AG and F-TECH in close collaboration to the headshaper Tommi „Verza“ Zorzi. He takes care of the park every day, selects good music and helps beginners giving them useful tips. Since back in the days Obereggen was one of the first resorts building a halfpipe.

REINSWALD

REINSWALD

SUNPARK REINSWALD

The Sunpark Reinswald in the beautiful Sarntal got its name because of the spectacular sunset which makes the park also perfect for sunset shootings. The park is divided in two lines: medium and easy, so it's perfect for beginners and more advanced riders. You'll find the park right next to the modern cable car at the "Plankenhorn" slope. The park is our newest project which we plan and build since 2011.

OTHER PARKS

GITSCHBERG JOCHTAL

We plan and build the park in the valley "Jochtal" since 2010. Nine different tables with F-TECH rails and boxes. Easy to medium structures and kickers make the park perfect for all levels of snowboarding skills.

HELM

The small snowpark at the mountain "Helm" is divided in two parks: a learning park for kids at the mid station and a easy and medium park down in the valley which has 7 obstacles in one line. We plan and build the park since 2010.

MEDIUM

OTHER PARKS

PAGANELLA

The Snowpark Paganella is located in Trentino and we plan and build the park since 2010. The park is equipped with F-TECH boxes and rails two lines on and 5 tables with easy and medium structures and kickers and is perfect for beginners and advanced riders who want to improve their skills.

KARERPASS

Surrounded by the breathtaking Dolomites we plan and build the snowpark Christomannos since 2009. Seven tables with small and medium structures and kickers by F-TECH guarantees you a nice shred in the park.
